METCHEM 1025

Tube Forming Lubricant

Product Information

Metalloid manufactures a complete line of tube forming lubricants, which include straight oil, soluble oil, synthetic and vanishing formulations.

Description

METCHEM 1025 is a unique heavy-duty synthetic tube forming semi-paste designed to replace high chlorine, straight and soluble oil products. **METCHEM 1025** bends the most difficult tube jobs and is especially designed for stainless steel. **METCHEM 1025** provides superior hydrodynamic lubrication for long-term mandrel life. **METCHEM 1025** can be easily removed in warm water wash systems. In bending furnace heat exchanger tubes **METCHEM 1025** can be left in the tubes and burn ash-less when test firing the furnace.

Benefits

- Replaces high chlorine products
- Forms stable emulsion
- Outstanding corrosion protection
- Easily removed in warm water wash systems
- Exceptional mandrel life
- Excellent choice for bending stainless steel and aluminize steel

Specifications

Specific Gravity @ 70degrees F	1.06
Ph, Concentrate.....	9.3

METCHEM 1025 is used as is.

METCHEM 1025 is available in 5-gallon pails, 55-gallon drums.
